

Simplify, Condense, and Enhance Your Insurance Plans

Oh, and by the way, you can save
over \$25,000 too!

A Common Credit Union Challenge

A small credit union was spending countless hours every week managing six different lines of insurance coverage through multiple brokers. Costs were increasing, plans were becoming more restrictive, and employee utilization was diminishing.

The credit union needed a trusted partner to improve the process.

The Action

The credit union partnered with InterLutions, the nation's premier employee benefits CUSO, to help evaluate their plans and optimize their partnerships.

After reviewing utilization reports, consulting with management, and evaluating best-in-class networks, InterLutions presented a proposal to simply the ancillary plans, digitize the enrollment process, and enhance the benefits package.

The Result

The credit union condensed their insurance partners, improved their plan designs, digitized their entire benefits administration process, and realized over \$25,000 in annual savings.

Here's what Casey Mayo, Human Resources Manager at Ripco Credit Union, had to say about the partnership with InterLutions and the improvements our CUSO made to their benefits plan:

"It's nice to have a company that is on your side. Not only did they make our job easier in so many ways, but they also saved us a lot of money, and gave us peace of mind. They are only a call or email away, and they respond so quickly. I'm so glad we made the switch to I-Care!"
